

MEDIA RELEASE

Jakson Green Limited through its consortium signs 85,000 MT Per Annum Green Ammonia Purchase Agreement with Solar Energy Corporation of India Limited (SECI)

- *The current project timeline contemplates commencement of green ammonia supply in 2029*
- *The cumulative contract value is about US\$ 465 million*

6th April 2026, New Delhi: Jakson Green Limited, a green energy transition platform, today announced the signing of green ammonia purchase agreement (GAPA) with the SECI for the supply of green ammonia under the Strategic Interventions for Green Hydrogen Transition (SIGHT) Programme – Component II: Incentive for Procurement of Green Ammonia Production (under Mode-2A) Scheme of the National Green Hydrogen Mission (NGHM) Government of India to Coromandel International Limited located in Kakinada, Andhra Pradesh.

The estimated contract value over the contract period is about *US\$ 465 million*. This follows Letter of Award (LOA) received by Jakson Green and consortium from SECI in August 2025.

The SIGHT Programme, India's first green hydrogen and green ammonia procurement program, is being implemented to incentivise the production of green hydrogen and green ammonia in India and enhance cost competitiveness through transparent competitive bidding. Jakson Green secured this capacity through a competitive auction conducted by SECI.

Jakson Green, through supply of green ammonia intends to contribute to the decarbonisation of the fertiliser value chain while supporting the Government of India's ambition to position the country as a global hub for green hydrogen and its derivatives.

Sharing his thoughts on the GAPA signing, ***Bikesh Ogra, Vice Chairman & Global CEO, Jakson Green said***, "This agreement underscores our commitment to building robust, future-ready green energy solutions at scale. We are proud to be one of the contributors in NGHM which has been designed to accelerate India's transition towards clean energy, strengthen energy security and build domestic capabilities across the green ammonia value chain."

In addition to this GAPA, Jakson Green seeks to advance its positioning in green hydrogen and sustainable fuels with a strong portfolio of projects across India. The company, through its associate is currently developing two green hydrogen projects of 5,000 TPA each for Bharat Petroleum Corporation Limited (BPCL) and Hindustan Petroleum Corporation Limited (HPCL).

Jakson Green has ongoing EPC projects in the green molecules business with an AAA rated public sector undertaking. The contract envisages three distinct and integrated plants for ethanol, carbon capture and hydrogen with capacities of 10 TPD, 25 TPD and 3 TPD, respectively.
